

VOI V2

VOI V2

VOI V2 is a verification of identity (VOI) flow that is designed to meet ARNECC (Australian Registrars' National Electronic Conveyancing Council) requirements for multi-document verification.

Document Types

The following table lists the document types that are available in the VOI V2 flow.

ID Type	OCR Enabled?	Fraud Assessment	1st Doc	2nd Doc	3rd Doc	Change of Name	DVS
All Passports	✓	✓	✓	✓	Not common	✗	Yes - First Name - Last Name - DOB - ID Number - Card number
Australian Driver Licence	✓	✓	✓	✓	Not common	✗	Yes - First Name - Last Name - DOB - ID Number - Country
Australian Immicard	✓	✓	✓	✓	Not common	✗	Yes - First

ID Type	OCR Enabled?	Fraud Assessment	1st Doc	2nd Doc	3rd Doc	Change of Name	DVS
							Name - Last Name - DOB - Immi Card Number
Australian Photo Card / Proof of Age	✓	✓	✓	✓	Not common	✗	Not supported by DVS. If the customer is performing a DVS check on the first document, then the Proof of Age card should be removed as the 1st document.
Australian Medicare Card	✓	Not enabled by default. Contact us to enable this.	✗	✓	✓	✗	Yes - First Name - Last Name - DOB - Expiry (taken from the first doc) - Medicare number - Ref - Card Colour

ID Type	OCR Enabled?	Fraud Assessment	1st Doc	2nd Doc	3rd Doc	Change of Name	DVS
Australian Birth Certificate	✓	✗	✗	✓	✓	✗	Yes Details differ per state.
Centrelink	✗	✗	✗	✓	✓	✗	DVS connection is not supported by IDVerse.
Australian Citizenship Certificate	✓	✗	✗	✓	✓	✗	Yes Details differ per state.
Australian Certificate of Registration of Descent	✗	✗	✗	✓	✓	✗	DVS connection is not supported by IDVerse.
Australian Marriage Certificate	✗	✗	✗	✗	✗	✓	DVS connection is not supported by IDVerse.
Australian Change of Name Certificate	✗	✗	✗	✗	✗	✓	DVS connection is not supported by IDVerse.

Note:

When used as a change of name document, a marriage certificate is only an image capture and is not processed for optical character recognition (OCR).

Verification Steps

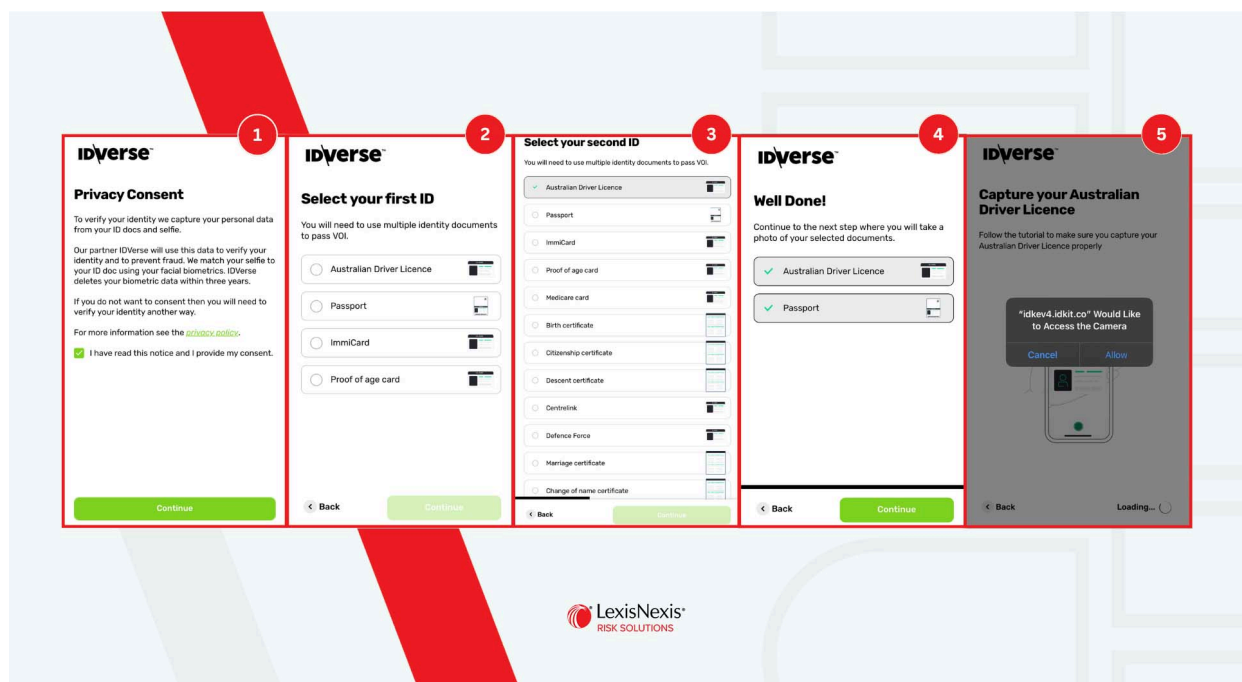

Users complete the following process steps in a VOI V2 flow:

1. Review and provide consent to the relevant (customized) terms and conditions and click **Continue**.
2. Select the first ID document, which must be a photo ID, to perform face matching.
3. The documents list is dynamically updated to show all accepted second documents. Select the second ID document from the list.

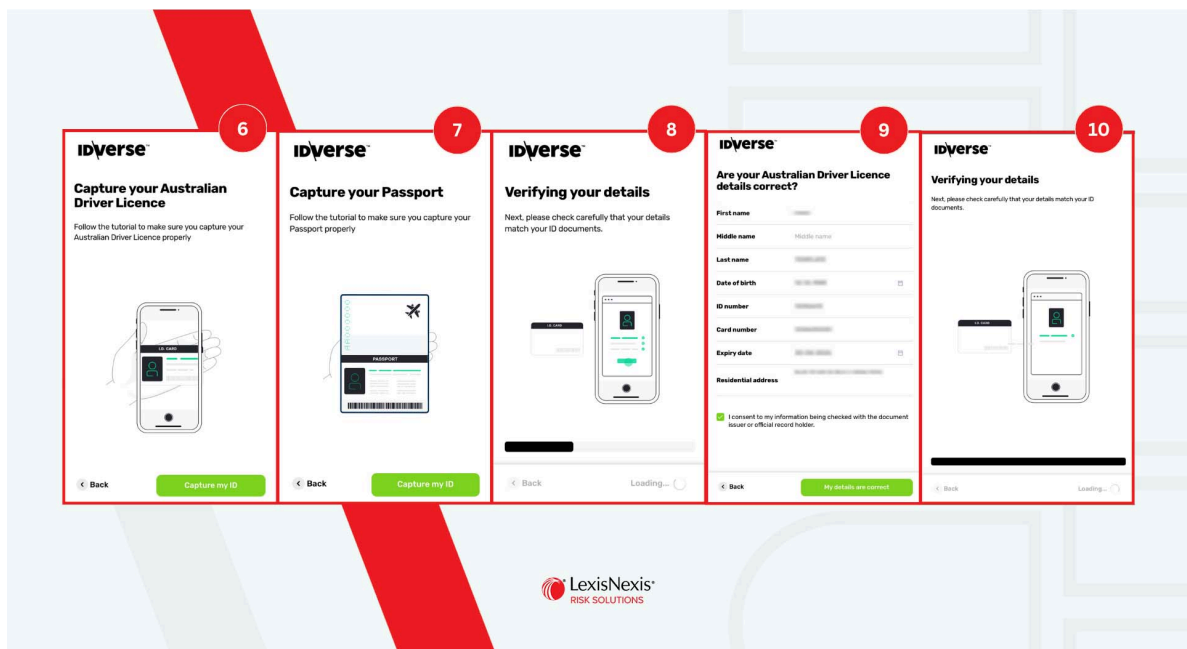

Note:

Only two documents are needed if the first and second documents are photo IDs. Otherwise, a third document is also required. For example, if a user uploads a driver license and a Medicare card, an additional document such as a birth certificate is required.

4. The selected documents are displayed. Click **Continue**.
5. Give permission to use the camera to capture pictures and videos.

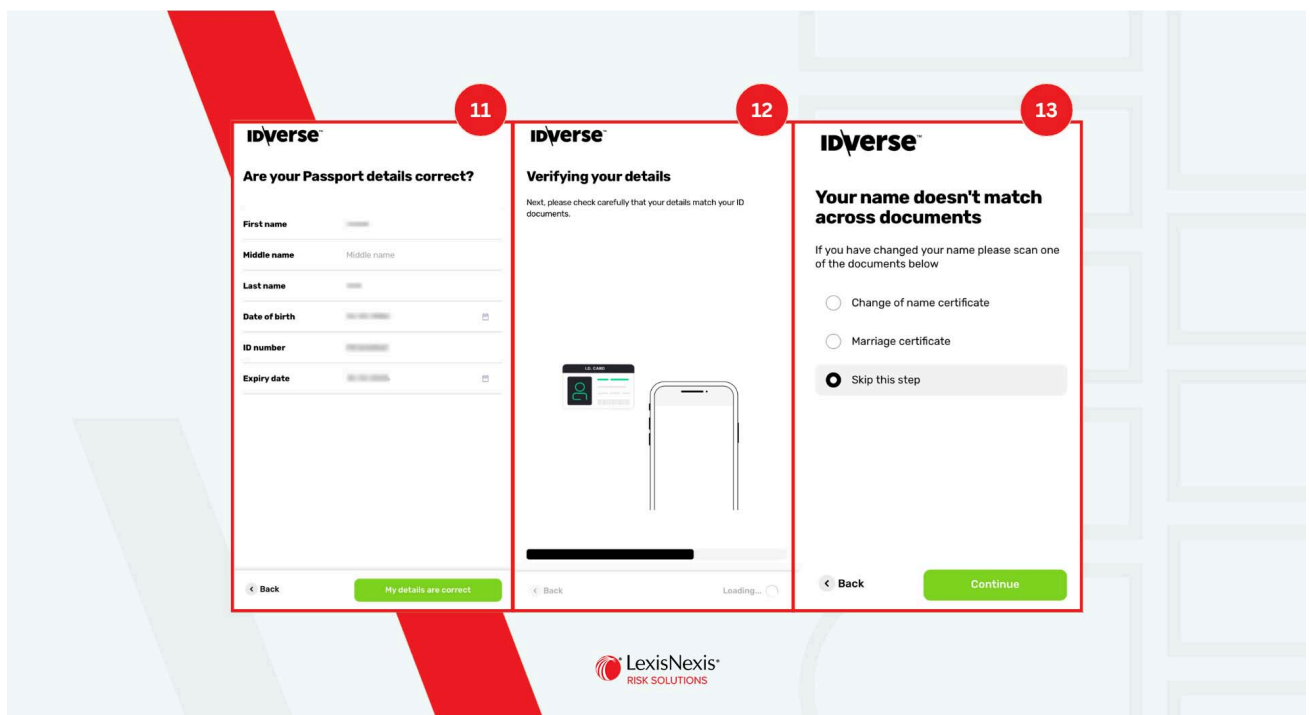

6. Follow the instructions to capture the ID documents.
7. Confirm the data that was extracted from the first ID document, give consent, and continue.

Note:

Data verification checks are performed on submission of the transaction. These checks confirm if the document exists in government-sourced databases.

8. Confirm the data extracted from the second ID document, give consent, and continue (repeat the process for the third document if captured).
9. If the names don't match across all documents, the user is asked to optionally upload a change of name certificate or marriage certificate. The change of name certificate and marriage certificate are only stored for reference and not processed for OCR.

Note:

- Name matching is not case sensitive and uses exact matching for the first and last names.
- If multiple individuals are listed in a document (such as in a Medicare card), the following screen is displayed for the user to select their name.

Which number reference are you?

☐ 1 L STRALIA

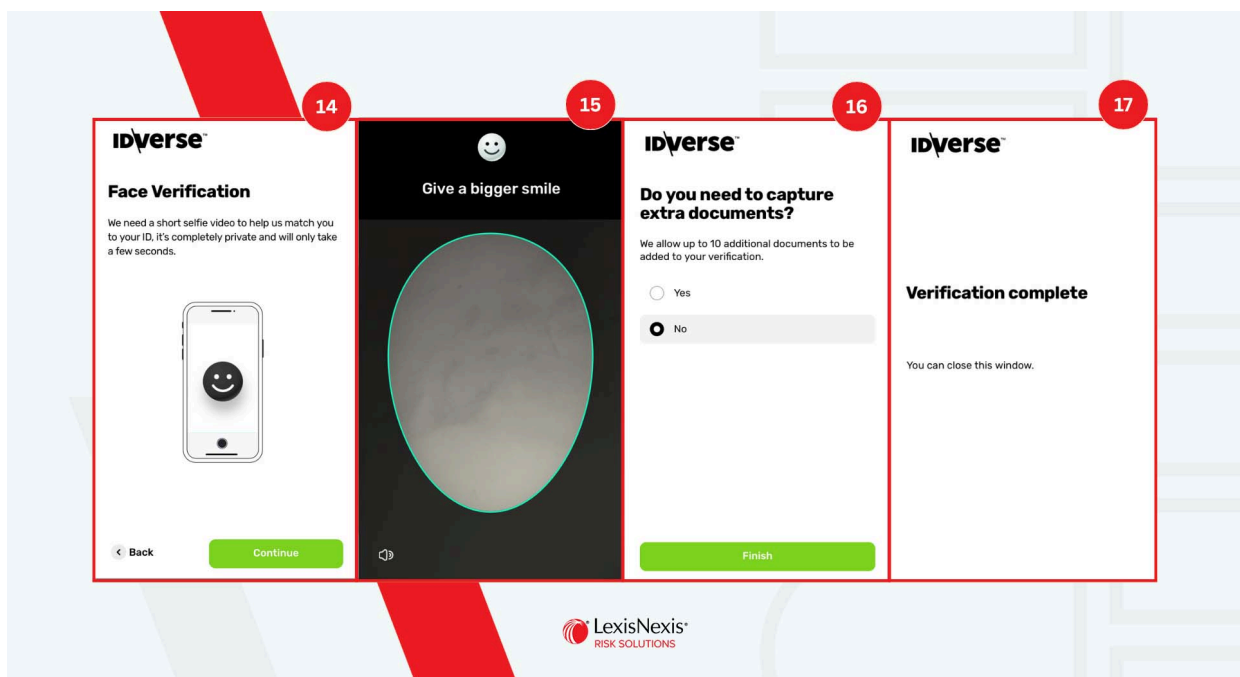

☐ 2 AI STRALIA

☐ 3 S STRALIA

☐ 4 K STRALIA

[Back](#) [Continue](#)

10. Prepare for the liveness check by following the instructional animation. Tap **Continue**.
11. If necessary, capture up to 10 additional documents or images that can be added to the verification record (this is an optional configuration).
12. The verification is complete.

We Are Here to Help!

If you encounter an issue, find a bug, or require assistance, please contact our **Support Desk** to find the solution. Don't forget to provide all the critical information about the issue.
